Re: 2014 Lead-Free Federal Legislation

Dear Eemax Customers,

On January 4, 2011, President Obama signed into law the "Reduction of Lead in Drinking Water Act," which revised the definition for "lead free" in the Safe Drinking Water Act (SDWA) as it pertains to "pipe, pipe fittings, plumbing fittings, and fixtures." The national law, for the most part, replicates California's regulation governing lead in drinking water, with many of the same test requirements and product exemptions. This law goes into effect across the nation on January 4th, 2014.

1. Eemax products have been certified Lead-Free since the inception of California law AB1953 and NSF 61, Annex G on January 1, 2010 through the Water Quality Association of Lisle, Illinois. You may visit their website at www.wqa.org, and do a product search under Eemax for a complete listing. Also, NSF 61, Annex G has been changed to NSF 372.
2. Since our products are certified lead free, we do not have a need to identify them separately from non-certified product.
3. Our products were tested and certified as compliant without any changes to wettable parts, so any existing stock before 2010 is compliant.

If you have any further questions or concerns, please contact me.

Sincerely,

Robert Horton
