

The new degree of comfort.™

IT'S TIME TO BE MORE COMFORTABLE

The Rheem *Classic*® Series Package Air Conditioners are designed for durable, long lasting performance while keeping your utility bills low. It's definitely a package you can live with – comfortably.

RACA14 Classic® Series 14-SEER

Peace of Mind

Relax with Rheem. Our Package Air Conditioners include a list of features that ensure performance that will keep your home comfortable for years to come. We also offer some of the best warranties in the industry.

Reliability

We're serious about the quality of all of our products. That's why our Package Air Conditioners are developed with technology that provides unmatched reliability and durability for years of worry-free operation.

We Thought of Everything... And Then Some

The Rheem *Classic*® Series Package Air Conditioner was developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Rheem Package Air Conditioner to bring you and your family years of comfort.

All Wrapped Up

The Rheem *Classic*® Series offers comfort that fits your lifestyle – and your budget. Unique design features are built in to deliver years of reliable and efficient operation. It's all the comfort you deserve, wrapped up in one smart unit.

Reliability is essential to your comfort at home. That's why we've designed our Package Air Conditioners with a **1 micro-channel refrigerant system**. The system includes all-aluminum evaporator and condenser coils that fight corrosion and keep your unit operating like a pro. The RACA14 features a unique **2 water management design** that diverts water away from the critical components of your air conditioner, preventing leaks and other potential problems. We've also included **3 louvered coil protection** to prevent damage to the coil fin. This added protection keeps the coil running longer for a better overall performance from your unit.

Efficient operation is on everyone's mind these days, which is another reason our **1 micro-channel refrigerant system** is a plus. Micro-channel technology is responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models. Our units are also designed with 100% scroll compressor technology for enhanced reliability, performance and efficiencies. You'll like the way it operates – and you'll love the difference it makes on your energy bill.

Quieter operation is attributed to several design features of our new *Classic*® Series Package Air Conditioner. A durable cabinet design combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is reliable.
